Vehicle information

In order to enhance security measures, Camp Copass requires that each participating church provides us with a list of vehicles intended to stay on campus throughout the camp week. This list should have license plate details and vehicle information for each entry. Upon completion, each vehicle will be issued a parking sticker, to be placed either on the windshield or rear window. This sticker serves as a clear indicator for our security team, ensuring that the respective vehicle is authorized to be on camp property.
